MMR_0561 George Gilbert

I have been a Southern model railroader for over 40 years and have been active in SER and NMRA activities for 20 years. In those years, I have built a bunch of models, some even good. I have been privileged to win awards for some of those models. I have had the opportunity to share some of my modeling interests in the pages of Railroad Model Craftsman and Light Iron Digest. My personal modeling interests are in late 19th and early 20th Century shortlines. My appreciation of what other modelers have done includes the entire range of this very engaging hobby.

It has been my privilege to serve as SER Director, AP Chairman, and SER Secretary in the past. For many years, I have served the Cumberland Division as the AP chairman. I am also a Board member and membership chairman of the Tennessee Central Railway Museum. I am involved in all these things because I have so much fun with Model Railroading.

I believe that we who want to continue to enjoy this wonderful hobby, must do what we can to help nurture and grow the small world of model railroading. It is in our own interests that this continues to be a viable market, attracting the industry that supports us. We help when our clubs and organizations show the fun we are having and attract new people to our fun.
